

YASHASHREE JOSHI

B.Tech Student | Computer Science – AI & Data Science | Research

yashashree0102@gmail.com | +91 80074 81937 | [LinkedIn](#) | [GitHub](#) | [Kaggle](#)

SUMMARY

Second-year B.Tech student (CSE – AI & Data Science) with hands-on experience in software development, data handling, and building AI-powered systems. Experienced in cross-functional team collaboration, structured problem-solving, and user-centered software design. 1 published IEEE research paper and 4 months of industry internship experience.

EDUCATION

MIT World Peace University, Pune

Jul 2023 – Aug 2028

B.Tech – CSE (AI & Data Science) | 2nd Year | Expected Graduation: Aug 2028

Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Software Engineering, Applied Calculus

TECHNICAL SKILLS

Languages: Python, C, C++, Java

Web: HTML, CSS, JavaScript

Data & Tools: SQL, Microsoft Power BI, Data Visualization, Git, VS Code, Google Colab

ML & AI: Deep Learning, Computer Vision, Data Mining, Model Evaluation, Statistical Analysis, Image Processing

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Soft Skills: Collaboration, Problem-Solving, Communication, Ownership

EXPERIENCE

Trainee AI Engineer Intern – Ingnious AI Pvt. Ltd., Pune

Jan 2025 – Apr 2025

- Developed and compared 3 CNN architectures (CNN, ResNet18, ResNet50) for facial keypoint detection; reduced Normalized Mean Error (NME) by 43% to 0.0204 through structured hyperparameter tuning.
- Ran 10+ controlled data augmentation and learning-rate experiments to improve model convergence stability across 5 test configurations.
- Collaborated with engineering teams to analyze performance trade-offs and model efficiency using quantitative metrics.

Overall Student Coordinator – Technophilia, MIT-WPU, Pune

- Led end-to-end planning, execution, and team coordination for all Tech & Non-Tech events with 30+ volunteers and high participant engagement.

PROJECTS

Parking Management System (C + Web Version)

- Built in C using arrays, structured programming, and file handling for slot management, search, and billing. Rebuilt as a full web application (HTML, CSS, JavaScript) with array-based slot allocation and localStorage integration.

AI Recipe Assistant (Python + Ollama + Google Search)

- Built a command-line recipe assistant that generates recipes using a local AI model (Ollama/LLaMA3) fully offline, and searches real recipes via Google Custom Search API; supports ingredient and taste preference detection with smart keyword preprocessing.

Classroom & Timetable Scheduler (C++)

- Built a smart scheduling system using OOP, Crow framework, and file handling to automate room allocation, eliminate scheduling conflicts, and provide fast, reliable room-wise data management.

DRT Case Intelligence System (Ongoing)

- Developing an AI-driven analytics platform for 1,000+ legal case records using data mining, NLP, workflow automation, and decision-support modelling for Debt Recovery Tribunal data.

PUBLICATIONS & RESEARCH

Guardian Intercept Dementia: AI-Based Voice Assistance System

Nov 2025

Co-author | IEEE I2ITCON 2025 | [Paper Link](#)

- Designed an AI-driven speech assistance framework for cognitive support using structured task modeling, contextual response generation, and intelligent workflow design. Selected from 200+ submissions.

Venus Atmospheric Wave Sonification using Machine Learning (Ongoing)

- Developing an ML framework to convert large-scale atmospheric datasets into structured audio for comparative pattern analysis.

Phonetic Structure Analysis of Sanskrit Recitation (Ongoing)

- Applying computational signal processing, feature extraction, and statistical modeling to analyze phonetic regularities across 100+ recitation samples.

ACHIEVEMENTS

International Computer Science Competition (ICSC) 2025 – Global Finalist

- Ranked 2nd globally in C Programming Runtime Performance (Semi-Final A1) among 10,000+ participants; 13th worldwide in Semi-Final B1; 14th in Qualification Round; top 10% in global final (14 points scored).

Core Organizer – Vishwanova Project Expo, MIT-WPU

- Managed project evaluation workflows and participant operations for 250+ teams Pan India; oversaw event execution with 2,000+ attendees.
